Notice: Electronic Signature for DMT-DD v2.06 and Later Versions

If DMT-DD 2.06 or later version is to be used on Windows7 or later OS, the OS needs to be supporting SHA-2 signature algorithm. If the system is not supporting it, Windows update will be required.

As of November 27th, 2020, the following update needs to be installed if Windows7 64bit is to be used.

Security update program for Windows7: KB3033929

There is no such requirement for other OS.

Sincerely,
DMC Co., Ltd.
